

# Self -Aligning Rotator

(Capacity from 2T to 800T)

NET CATALOGUE

**V WELD EQUIPMENT**

**V-WELD** Self Aligning rotator, (**VSAR models**) are primarily used to manipulate circular jobs for welding needs & specially used for thin walled jobs and also for heavy loads. The self aligning design of rotator, adjust wheels setting automatically as per the resting vessel diameter. This feature of self-aligning rotator, makes it easy & fast loading of jobs, where job diameter varies very frequently.

Various options and models are available. Contact us, for more details/inquiry.

Due to policy of continuous improvements, V-WELD reserve the right to modify their specifications without prior notice.
